Whispers from The Brighter World

Friday, August 14, 2015 — 10:00 a.m.

The number of messages given here by the alliance of Sahaj Marg Masters is unprecedented in history; why not emphasise it once again. This fact is significant. It demonstrates the importance of Sahaj Marg, the place it already occupies in this world, and the place it will have in the future when humans will advance more and more on a path of this kind. This world is not destined to stagnate in violence and in the misunderstanding of paranormal phenomena. Gradually, these phenomena will be revealed in terms of what is real and essential in the process of life, as supported by the reincarnation of beings through the long journey of souls for their evolution. In these messages, we cannot delve more deeply into these laws. One day maybe this will become possible, but not today.

Let us proceed step by step in what is offered to us at the current moment, when spiritual progress is decisive for all. Following the path that we propose here, with its utmost simplicity, surely provides beautiful prospects in order to achieve the best — that which we wish for one and all. Here as elsewhere, nothing is ever easy; in each of the created worlds there are laws that need to be followed for the good of all. Does a world that is perfect in every respect exist? We cannot say, and such is not our purpose. For all to advance towards the best is already important in preparing them for what is to come. We do not make grand promises as has already been done. We just focus on what is real — the advancement of all our abhyasis, in which all must achieve the best. We see to it in our own manner; this requires a real commitment from everyone. This is how it is, under our blessings.
