Beloved Master

Revered Babuji Maharaj

Whispers from The Brighter World

Saturday, August 29, 2015 — 10:00 a.m.

Kamlesh's stay in Montpellier will be very productive; his action is special and will mark these times in our Mission. The Mission will expand more and more, becoming more accessible through a simplified approach; there lies the main thing, and so it will remain. The heart of the united Masters generates an unparalleled force, one that fosters the work of the living Master as well as the inspiration that guides him. We want the best for him and for each of the abhyasis who trust us. Our spiritual Mission is adapted to the current era, which is in total disarray, and yet it stands at the crossroads of two worlds, in which the beginnings of a different future are already taking shape — a future when our way will find all its justification and an effective action for the good of all the beings who will follow it with confidence and the determination to progress in this incarnation. The opportunity is granted to them here [in our way]; may all fully benefit from it and thus save valuable time. Blessed are our dear brothers and sisters who are committed and confident in our action."
