Whispers from The Brighter World

Saturday, September 19, 2015 – 10:00 a.m.

A spiritual way like ours is intended for the greatest number. It remains an easy approach, and its teaching goes to the essential in terms of results, without complicating it any more than that. Attaining the goal does not depend on an intellectual approach. Here, it is about something quite different – developing in each person the subtlety, the necessary finesse, to receive a transmission capable of transforming a person to the highest level of being. Our words are addressed to the greatest number, many of whom draw from them the desired benefits. All are involved and receive according to their personal call and their own capacity to receive.

May this abhyasi rest assured; she is making her way, and we are guiding her accordingly for the most beautiful personal achievement there is. No one is forgotten. Our aim is to help the greatest number attain the ultimate goal – the most rewarding there is.

Blessings to all.

Babuji
