Whispers from The Brighter World

Sunday, October 18, 2015 — 10:00 a.m.

These messages accompany many of our abhyasis, more than they sometimes think, in their approach to their practice and in their long-term commitment. Creating a mystical vibratory chain that can benefit all of them is a very positive matter, an additional element to unite our brothers and sisters through our rather original approach. To have such a privilege in one's life is truly a blessing. We are following each of our aspirants according to their appeal — and well beyond that, at levels of consciousness which they themselves are not able to identify. Here, we will be able to assess the results achieved. When our brothers and sisters come to join us, they truly discover what Sahaj Marg represents in this sphere that is so greatly ignored by the majority of men and women, who totally neglect this essential aspect of life. We are pleased with the results; everything is done to achieve the best. What more can we hope for? An unprecedented progress and an even greater commitment from all members. Everything comes in its own time. Our blessings on this day literally cover the Mission; it is so dear to us, you can be sure. It will continue to amaze all of you — and us as well. Our best to all."
