Whispers from The Brighter World

Tuesday, October 20, 2015 — 10:00 a.m.

A spiritual Master is never spared; in every respect, he is confronted with human fluctuations — unceremoniously. We have all suffered the behaviour of others and have been the object of criticism; so it is with human beings, and this is not about to change. The work of a spiritual way aims at advancing the being in every aspect and raising his or her awareness with regard to what is most important, leading to a level of consciousness sufficient for a person to integrate more easily into other planes of consciousness where another work awaits. The human being is not yet at the end of his or her struggles, of the necessary undertakings that help a person to really progress by avoiding an excessive waste of time. We wish the best for all, hence our unceasing action. Sahaj Marg operates in its own manner, quietly; we want to avoid power struggles and actions that would not correspond to the spirit of the Mission.

"Nothing is perfect, ever. This world is subjected to laws from which we are not exempt. Nevertheless, the higher powers support our work; it is understood and appreciated, which further motivates the alliance of divinely inspired Masters. This way benefits from a very special monitoring process which cannot be truly assessed on the material plane. Everything has a meaning, you can all be sure — even trials are necessary. One day all of you will understand the reasons for them and enjoy the resulting effects. Surrender and love are needed more than ever, under our ceaseless blessings."
