Whispers from The Brighter World

Saturday, October 24, 2015 — 10:00 a.m.

Prayers emanating from the heart greatly delight our hearts. These prayers are the expression of a love that is highly discreet, yet one whose action beyond this plane of consciousness is real. This love is an active form of faith in the Masters and the entire hierarchy. Being itself highly supported, it continuously revels in the divine source. This state cannot be described. It is lived intensely, each person receiving it and, above all, experiencing it in his or her own manner. The great mystics of the past and present converge and are carried by the same sublime energy which delights them beyond all expression. Is there anything more beautiful to experience, more exhilarating, more redeeming, than this intense faith. Love attracts love; it cannot be explained, as it is so far beyond human understanding. There lies the grace that carries the soul on to prodigious heights and knows no limit. A fervent soul can only be fulfilled. We are seeing to it here where these impulses are well received and fulfilled by the effects they produce, such that the heart expressing them is fully satisfied.

"We wish peace and love to all, here and beyond the material plane where this necessary work is performed. Special blessings."
