Whispers from The Brighter World

Monday, November 23, 2015 – 10:00 a.m.

There is always something to be said. These contacts are very special. They are the result of an extraordinary love between our hearts and the heart of our scribe. Do not be embarrassed; so has it been since time immemorial that specific mystical ties develop between devoted and divinely inspired souls for whom only service matters. Some beautiful stories are also written, and they leave their mark on time, a time that will not be forgotten. On the contrary, it is leaving lasting traces, and for good reason. In such a context nothing is in vain, in contrast to the numerous movements of life that are merely bustle and noise. Everything has its raison d'être; this spiritual path so dear to our hearts was not created in vain. It is the result of consultation at the highest level of the hierarchy of Masters. It is suited to present times and will be perfectly adapted to those of the future, when humans' demands will continue to grow. The evolution to come will require a lot, and at all levels; society will be structured differently, on new foundations difficult to imagine today.

Hyderabad will become the high place of the Mission. It will attract a large number of men and women motivated by a deep longing for spirituality – a true spirituality that acts upon the most subtle and decisive levels for human evolution. An

unprecedented future is being prepared at that level. Blessed are our brothers and sisters who are fully committed to this way. It generates the best – thus is history written.

To all of you, our blessings.

Babuji
