Whispers from The Brighter World

Wednesday, December 2, 2015 – 10:00 a.m.

See all these beautiful testimonies coming to you regarding these messages – they help so many of our brothers and sisters who are attentive to what emanates from our hearts. These writings touch their hearts much more than they can imagine. Why would they have been given, and for so long, if they did not operate beyond human perception, in accordance with our wishes and for good reason? We want to help the greatest number of people overcome the barrier of current limitations in this world – a world that is subjected, truly so, to disturbances of all kinds. Electromagnetic pollution is worrying. Who cares about it these days? The ease of work provided by these devices is such that a majority of people use them, creating disorders that are not taken into consideration. Time will bring to light this important aspect of the present situation. We had to draw the attention of our aspirants to this issue, although our action lies elsewhere, on planes of consciousness far beyond the material. Yet, all is connected. The balance of energy in a human being is crucial for his or her attainment of higher levels of consciousness. One day harmony will have to reign on this Earth. Today's reality is, unfortunately, quite far from this pacifying aspect. In the future, great upheavals will come, cleansing the entire situation in this world.

Why not imagine a better world in which all human beings could blossom at all levels. A positive action is never in vain; something always comes of it.

Endless blessings to all.
