Whispers from The Brighter World

Saturday, December 26, 2015 — 10:00 a.m.

Every day is important. It gives rhythm to the movement of life and to what is necessary to build oneself on the human level and also on the subtle level, that is to say, spiritually. This is another domain, one that is governed by laws that totally escape human understanding. Even those who are the most refined do not possess all the pieces of information. In many circumstances, they approach some special states without being able to really define what is hidden in them. Thus, the human being must carry on his or her journey and focus on personal advancement. This is wisdom itself. The record of past years, decisive for a person's karma, still remains a mystery to each one; all these concepts are not easily understood by the common mortal. Assessing the impact of one's actions and the implications of one's thoughts is a sign of wisdom. Thought is an act — everyone should carefully bear this in mind.

"Following a spiritual path opens up new horizons. With time, some of our brothers and sisters are ready to go further. The sacred space is within them, in the very specific point that characterises it — namely, the heart. Here is the central axis of spirituality, the seat of the soul, the seat of true beauty, that which facilitates the advancement of each person.

"We wish for real advancement to all, motivated by a deep and sincere call offered to divinity, to the Mission's Masters, and to the living Master working here below, who is carried by their inspiration and moral support. The best is yet to come, namely, the realisation of this sacred quest in the making.

"Strength and determination to all, under our blessings."
