Whispers from The Brighter World

Monday, January 18, 2016 — 10:00 a.m.

This long story of messages is a true benefit for the Mission. We have repeated ourselves a great deal over these past years; this is necessary in such cases. It is not commonplace that messages from another world are given to this one — a world in which our Mission is gradually growing. This growth has been foreseen by a power that manages what is being done at this level for a planned evolution that is necessary in many respects. At the human level, it is not easy to evaluate the potential impact of such a process. Nevertheless, the benefits of spirituality are gradually extending in order to one day achieve the global transformation of humanity. These comments seem very unreal today, and yet the world of the future will differ completely from the world of today. Since its beginning, so many changes and great upheavals have occurred in order to reach the current stage, which you can be sure is preparing for an unprecedented transformation. Through our action, we will continue to contribute to it in our own manner for the general good of human beings; spiritual evolution will be decisive in this area. As for our part, solid foundations have been laid and will be widely established in the future with our support and blessings."
