Whispers from The Brighter World

Friday, March 4, 2016 — 10:00 a.m.

To love intensely, infinitely, is the greatest wealth in the world. Such a connection with the Divine is a unique gift, and achieving this level of consciousness is promising. From one incarnation to another, work is carried out that will one day allow one to reach the apotheosis. Seeing our faithful abhyasis committing and opening themselves up to a knowledge that is irrefutable, is a unique benefit. All these beautiful souls unite together and progress under the guidance of the living Master who is himself inspired by the higher Hierarchy.

"Let us shape the future of this Mission, whose expansion will be considerable; it will bring together the greatest number. Emerging movements will join us in order to complete this action and to advance even further the results achieved in this special process, one in which our candidates are positioned very satisfactorily. The Sahaj Marg Mission will expand this work more and more, as it will be facing a growing call in accordance with the divine plans. The future will bring about an expansion of consciousness in order to meet the needs of the new era. Our abhyasis are advancing more than they realise; these concepts cannot be easily assessed. What matters are only the results obtained and the power they will deploy for the general good.

"Blessings to all."
