Whispers from The Brighter World

Saturday, March 5, 2016 — 10:00 a.m.

All these years of contact have resulted in this fact of a daily and unfailing ritual. A love that one might call extraordinary drives these comments. Beyond the words, a specific energy touches receptive hearts and provides them with nourishment that is rich in its effects. All these messages are not given in vain. Together, they build a special space in our Mission, and most of them will defy time. A touch of eternity will grant them a chosen place. The new era will bring about changes that have long been planned, generating transformations that cannot be imagined by today's human beings. All of these messages will be recognised and respected for their very special essence which emanates from the Divine.

"The current Mission will be transformed and benefit from sound support in various parts of the world, where spirituality will hold a real place in accordance with the growing needs of incarnate beings. Abhyasis who have come to rejoin us here constitute a force that will increasingly work for the good of this way of the heart. Its effects are unparalleled, as it truly enables spiritual progress. Life on Earth is bound to change a great deal, though it will keep the same requirements: those of an ever greater subtlety that will lead it to the highest level of consciousness.

"Special blessings to all."
