Whispers from The Brighter World

Tuesday, March 8, 2016 — 10:00 a.m.

This long journey comprised of messages has touched many hearts, more sensitive to the comments therein than they themselves believe. Years are passing, and thousands of pages have accumulated, bringing this special gift to the path of Sahaj Marg. We are repeating ourselves over time, just as life does in the world through its numerous workings, giving it the power of creation in all its aspects. The power of creation is quite astounding — it produces such diversity. Human beings will continue to be surprised; they still have much to discover. Progress will allow them to approach phenomena differently, promoting real advancement in many domains.

"Civilisation of the future will reach a very high level of access to essential truths. Today's seeker would be amazed by such discovery. All in good time. Yes, the Earth is round — this piece of knowledge has been established for a long time, but you all can be sure that many others remain to be discovered. Divine laws don't reveal all their effects. Tomorrow's human beings will attain such a level of consciousness that they will reach a stage of knowledge that is unprecedented. Spirituality will not be left out; it will be positioned differently, and it will be better understood and followed in all its subtlety. The reign of the Spirit is dawning on the horizon. It will literally light up the world. This is how it is.

"Special blessings."
