Whispers from The Brighter World

Wednesday, March 16, 2016 – 10:00 a.m.

The gates of bliss are opening within you at these precise moments when your heart is completely offered. This ritual is inscribed in time, and our action has never failed, nor has your surrender to this feat – that of noting down such a large number of messages. The path of Sahaj Marg is worthwhile, you can be sure. The passing years give to things and events their rightful place. The action of this Mission is very positive. We witness its results and this enables us to prepare an even greater future for it, one that will bear the best fruit. 'Only the spiritual will save the world,' said an enlightened person on the future of this humanity in distress in many ways. Why the wars and incessant violence that endlessly distort the nature of this humanity? Will human beings ever succeed in realising their true nature, which belongs to a divine energy unfurled on Earth for good reason. How much more strife and suffering will it take to reach a sufficient level of consciousness where the best could be accomplished.

Only continuous action is desirable and will allow real progress. You can be certain that such a time will come. The future will reveal a new world brought about by an unprecedented change in the level of evolution. We are preparing it. It is up to all our brothers and sisters to strive for the best.
