Whispers from The Brighter World

Monday, March 21, 2016 — 10:00 a.m.

Immerse yourself in this ocean of love where light is radiating — that light in which the Masters continue their progress towards subtler states that are so important for their dazzling rise. Arriving at this level of consciousness opens up gateways onto the Infinite. These openings are humanly indefinable and indicative of divine powers that are given on a limited basis to the noblest souls, those capable of playing a decisive role in this world. Sahaj Marg's action is very effective. This way promotes the opening of subtle points that can transform the being and reveal his or her true nature, one that is quite far from the material plane. Some of our brothers and sisters manage to go through steps that open up new perspectives onto higher states of consciousness whose "reality" is difficult to detect. This reality is so often mentioned but still so poorly perceived, due to the global evolution of a humanity that is struggling to emerge from all the dismaying effects that hinder it. The time of transformation will come. It is being prepared in its own manner, you can be sure. Like everything here below, this is happening very slowly, but in a positive manner despite appearances. Spiritual advancement is a precious asset for one and all, but life is a whole that is globally united before the higher powers that are very attentive to its transformation. Everything is slow on this planet which is advancing at its own pace in this celestial configuration. What will the world of tomorrow be like? Far from what it is today. It is up to each and every one to prepare it in their own way, in accordance with the divine laws.

The best to all of you, who are so dear to us.
