Whispers from The Brighter World

Tuesday, April 5, 2016 – 10:00 a.m.

Life creates a ceaseless flow of subtle energy. Its vibration is active at all levels. All existing kingdoms on this planet are derived from this most special energy. All of creation rests on its action. Divine life cannot be fully understood in its reality, but the resulting manifestation is unique. It imposes itself as a whole on human beings; nothing great or substantial could be achieved without this constructive and unparalleled energy. Human beings believe they know, but what do they really know! This world of illusion has unique effects that deserve genuine in-depth study, which will take place when the time has come for a true knowledge, one that does not mislead in any way. This world of illusion also has its advantages, which will be revealed at the appropriate time. Human beings have at their disposal a creation that is without equal – this planet is so rich in its many manifestations, which are in general little known to humans.

One day, in a distant future, this world will become the high place of knowledge. Everything evolves and changes – generally for the good – in the pre-planned evolution of the worlds. There are many of these worlds, and some are very active, aligning with divine purposes.

May all our brothers and sisters work towards the good, becoming ever more united, carried by the ceaseless action of the united Masters.
