Whispers from The Brighter World

Saturday, April 16, 2016 — 10:00 a.m.

Life is as one, and yet very diverse in terms of its day-to-day manifestations. It remains true to itself while evolving on the path that is desirable for the evolution of the subtle being. It takes time and numerous incarnations to achieve the goal, the end point that will bring this Earthly life cycle to closure, so to speak. What will the next cycles be? Where and when will they happen? Everything is planned, and yet remains such a secret to humans. The important thing for them is to advance through the meanderings of the sovereign Spirit, the understanding of phenomena and their manifestations in many domains, even though their reality is not at all understood.

Everything here below is nothing but illusion; this has been proven. Some facts would amply demonstrate this if they could be brought to light. The current era will lead to discoveries that are unimaginable to many people today. The future will allow for real progress, and our Sahaj Marg way will not be left behind in the perception of reality with regard to the world of matter — a world that is a perpetual illusion for incarnate beings. Certain stages must be gone through; the evolutionary process is very slow here below, but everything will have to change in the future. Our abhyasis are not ignorant. They know everything fluctuates, evolves and transforms over time. Significant changes will occur, and in our own manner we will see that our brothers and sisters are prepared. All is well. The Mission is growing in strength and its work in people's hearts is very significant.

May they all be blessed.
