Whispers from The Brighter World

Saturday, April 30, 2016 — 10:00 a.m.

Relax and glide through this universe of beauty where your heart delights in loving us. Here it expresses its full potential, and an extraordinary love carries it on this anniversary day of celebration when it is enraptured by a very special vibration. This contact is not ordinary. It cannot be described in human terms, but we wish for something more to be emanating from this message, something capable of touching many beings who are carried by a special state of receptivity. As we have said many a time, celebration days in the Mission are very beneficial for all. They raise the level of vibration and unite hearts in a special manner, carrying them with our love, a fact that is not commonplace for them in everyday life. May they all devote enough time to this special day and enjoy it fully. One day, Sahaj Marg will amaze people with its development across the world and its genuine action for the spiritual progress of each person. So many beautiful souls are in need. In a certain way, they are out ahead of the general stage of spiritual evolution. Ground breakers are preparing tomorrow's world. They are, in their own manner, "divine envoys" whose mission is to position themselves accordingly and to generate positive vibrations. In their own way, these vibrations can bring about a healthier atmosphere — one that is currently highly disturbing for sensitive beings.

All our special blessings on this anniversary celebration. May all hearts be sensitive to it.
