Whispers from The Brighter World

Tuesday, May 3, 2016 – 10:00 a.m.

A beautiful space of peace and love emerges from these seminars, and each time we rejoice to see the effects on the hearts of our abhyasis. Life goes on with its difficulties and its many risks, punctuated nevertheless by moments of joy and serenity. These are nurtured in people's hearts, and many in our path take full advantage of an extraordinary transmission. It is not easily assessed, and yet the lives of many human beings are transformed thanks to it. It is a true blessing for this Sahaj Marg Mission, which is endowed with many assets. The new era will bring about unprecedented changes, without diminishing the effects of a growing spiritual path whose benefits will continue to increase and contribute to the elevation of humankind.

Everything in this world is advancing slowly and has long been planned. The reign of the Spirit will one day prevail here below. This is not a utopian notion but is the reality of a future whose specifics will be clarified for the achievement of the best possible. The Mission must be structured accordingly, lightening the work of the incarnate Master by creating a strong chain throughout the world – one that is supported by strong points, highly responsible, starting from what already exists, in order to simplify and consolidate things on the material plane. Everything is slowly coming together to face an unprecedented breakthrough in the future. May all our brothers and sisters take interest and become even more involved.

Blessings to all.

Babuji
