Whispers from The Brighter World

Friday, May13, 2016 – 10:00 a.m.

To the divine power, nothing is impossible; what is intended by it comes to pass, whatever the detours and efforts required. The human being is so small before it, and yet, by its power, the greatest, the most astonishing can happen. Our Mission moves forward, carried by grace; the great spiritual movements in the world did not come about without it; they are necessary, in the context of human evolution, passing necessarily, by an advancement in this field. Sahaj Marg is a safe path; in simplicity it accomplishes what must be, under the guidance of a Master acting in the best way, carried by our unceasing wishes and blessings. Human evolution necessarily involves an advancement on this level.

A spiritual openness promotes the blossoming of the being, at the most subtle level.

We see the progression of each one. All these years of practice have produced results that are sometimes astonishing.

May all invest themselves, to the best of their ability, to perfect what already exists and to go ever further in the discovery of the self, this "self" so mysterious and capable of generating the best in each one.

May all be strengthened and enlightened on this quest for the Divine, so essential and decisive for all our aspirants.

Very special blessings to all.

Babuji
