Whispers from The Brighter World

Saturday, May 14, 2016 – 10:00 a.m.

The path of Sahaj Marg traces its way through the time and space reserved for it. This Mission will take on an unusual expansion, through the work it accomplishes in hearts. This work acts with great finesse, beyond human comprehension, since it is located at the vibratory level where our action occurs. How to really define it, to live it – intensely, if possible, is the best way to benefit from it. A pioneer in the genre in some way, the deepening of its benefits will be based on visible and significant results in such an approach. Here, it is not about rituals or prayers, although they can be recommended; the work that is being done is at a very subtle level and is rich in effects for the abhyasi.

The Alliance of Masters consolidates the present and prepares the future; full of resources, this Mission will defy time and space, one might say, since its action is being felt beyond this world, where our brothers and sisters who have left it manifest regularly. Here, the union of hearts is real and it creates a remarkable movement, strengthening what exists here below. It is said that unity is strength, this is not new. Our abhyasis emerge, so to speak, from this material world, reaching out to us where the union of hearts is not futile and produces concrete results.

Nothing is ever simple, but here the results are well worth the effort.

We repeat it to you tirelessly, we do not give sensational stories as some of our aspirants would like. What needs to be done is done and the results are worth it. So it is, may all be blessed.

Babuji
