Whispers from The Brighter World

Saturday, May 21, 2016 – 10:00 a.m.

Such a heart connection lends these writings a very special vibration. Sensitive beings perceive this vibration and are nourished by it on a daily basis.

Repetitions are necessary, as we have often said. Without them what would become of this world and all that contributes to its development. Life consists of movements, transformations in the process of developing a different world where the best could be accomplished. The current era is one in which unprecedented profound mutations will occur; humankind must develop sensitive points capable of taking humans to the next level. While constantly changing, their innermost nature is evolving without appearing to do so. Spirituality as practised in this system is a valuable asset to accelerate this process which is beyond human awareness. Divine laws manifest in their own manner, very subtly and yet their action is astounding. We witness the effects every day and are grateful for their indescribable benefits. Sahaj Marg participates, in its own way, in this planned evolution; everything is taking place appropriately. Karmic laws manifest at all levels, they are inescapable. Life offers many opportunities – it's up to each one to make the most of them.

Blessings to all.
