Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Sunday, May 22, 2016 — 10:00 a.m.

Isolate yourself in this cocoon of love where these messages take shape. Unlike those coming from our imitators, these emanate from our united hearts. Our dear Kamlesh must remain vigilant on this point. This is nothing new, except that the number of imitators is increasing and this is incorrect. Some people are sincere in so doing, but they are being fooled, one might say. The Mission is growing; its action is being felt at different levels of consciousness, attracting souls beyond this world that are in distress and seeking an opportunity to express themselves there, but to no avail — hence the consequences being observed here below. Only our messages should be considered, as their sincerity and the action they can have on people's hearts have been confirmed over these many years. They are characterised by a specific energy, hence our unceasing action for so many years.

The Masters here are united and greatly support this action. It is unprecedented in history. This has already been stated by the previous Master, our dear Parthasarathi, who is so attentive to this Mission which he too will always carry in his heart. We want the best possible for this way, and his successor is supported and encouraged in his far-reaching projects, some of which will be implemented. All in good time. Evolution is moving slowly in the current era, preparing an unprecedented acceleration of phenomena for the future.

May all be strengthened and blessed. We are seeing to this.

Babuji Maharaj
