Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Saturday, May 28, 2016 – 10:00 a.m.

You yourself cannot assess the impact of these messages. However, you can be sure their action in this Mission is far-reaching. They have become an important element in our teaching.

Everything is wanted this way by the hierarchy of Masters, who are very attentive to the spiritual well-being of our dear abhyasis. They are all monitored and helped in accordance with the needs of the moment, to allow them an unprecedented advancement. The current era opens up vast horizons on the matter; many possibilities are offered for the expansion of Sahaj Marg – the incarnate Master is working towards it.

We will always guide him in this direction. He is the man for the job, one could say, and he will accomplish great things. This path holds a real potential, adapted to the current era. All this will be demonstrated in the future. Everything moves very slowly on this Earth; we can only adapt to its pace and seize the opportunities given to us to further its expansion. These writings will remain important in the history of our way – it is said that words leave, writings remain.

Human beings need references, concrete input, giving them something to refer to when necessary. Written tradition followed the oral tradition, having allowed the Great Beings of a very distant past to transmit a teaching that still holds true for their

followers today. Here, we can foresee the era of the future, to which the essence of this acquired treasure will be transmitted; we will see to it. So it is.

Unceasing blessings on this Mission.

Babuji
