Whispers from The Brighter World

Tuesday, May 31, 2016 — 10:00 a.m.

Only spiritual advancement allows a person's subtle being to truly grow. It is a real benefit to open one's heart to transmission as it is being practised in our Mission.

Human beings do not realise just how precious time is; they so often neglect that which could be an asset of great importance for them. The practice of Sahaj Marg refines the subtle bodies and facilitates a transmission that has a positive action upon them. These comments are not easily verified, and yet such is the case. After all, is it not the most important aspect in this process? We can witness such progress in committed abhyasis; they themselves cannot imagine such results.

Life is short compared to eternity. Every step is decisive, and it is wise to facilitate each one. The aura of Sahaj Marg is growing; the foundations of the Mission are being strengthened on the material plane and its spiritual action currently accounts for a level never seen before. This progress will keep generating the best results. Aspiration for the Divine will unfold more and more in people's hearts; it will be proper to respond to that aspiration. Sahaj Marg can do this, and it will do it very well. An unprecedented progress will answer the present and future calls. A real transformation of humanity hinges on that. Spirituality can provide so much to human beings; this fact does not always dawn on their consciousness but is revealed when required for one's evolution.

May all realise the benefits provided by this way of the heart and fully enjoy it under our ceaseless blessings.
