Whispers from The Brighter World

Sunday, June 5, 2016 — 10:00 a.m.

Relax, and let your heart speak — it does this so well. Many brothers and sisters follow you on this journey of messages that help them in everyday life. Love is the very essence of it; what would a life be without this redeeming energy that transforms beings through the long process of incarnations! All incarnations have their own purpose, each one being a link in the chain of karma, which is so secret to human beings that they cannot penetrate the reasons behind it. Why all these trials and sufferings — joys too, though they often do not last long. The only real purpose of a life is the evolution of the being with regard to his or her best aspects, namely spirituality, which is so necessary for one's personal elevation. Still, one has to become aware of this and, above all, to follow up on it. Until the end of one's life, a human being is given the opportunity to grow, to progress towards the source — one from which beings drink when they realise their true nature and are thirsty for the progress that is necessary and decisive on their journey. Brother and sister abhyasis are making great strides, and by joining us they save precious time. Everything is counted and recorded on the ledger of time. Karmic laws are extremely strict, and nothing happens without a reason. Accepting one's life is the best option for not making it any more of a burden.

The best to all, under our blessings.
