Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Thursday, June 16, 2016 — 10:00 a.m.

Why should we stop these messages? You receive them with happiness, and they are still read after all these years by many of our dear abhyasis. This asset is valuable for our Mission; the future will strongly confirm these comments. What is being done here with these messages should be considered as a blessing; it is endorsed by the hierarchy of Masters who fully support this action for the good of all. Its value is underscored by the uniqueness of these writings. They will become more and more valuable, in the sense that we understand value. Time will judge — this is how it is.

The Sahaj Marg Mission is advancing and expanding worldwide, responding to an expectation that corresponds to the present time — a time that is at the junction of two worlds and, one might say, in a state of total disarray. Humans are destabilised by harmful vibrations produced by what many of them consider to be progress. What price is being paid for that? It is nice to have an easier life, provided the devastating effects are minimised. Comments will be confirmed more and more by real facts, thus becoming obvious to all. The pervading negativity is dreadful in more ways than one; it is up to each one to become aware of this and protect themselves. We want the best for all our abhyasis, but we are still powerless in this domain. We are working in our own manner, for the good of this Mission.

The best ever to all our brothers and sisters, under our blessings.

Babuji Maharaj
