Whispers from The Brighter World

Saturday, August 20, 2016 – 10:00 a.m.

On Earth, there is a time for everything. That of clemency and the blossoming of the human being will come. The expansion of consciousness occurs at each level; the highest one to be reached is still far ahead, but it is being prepared in our Mission for the general good. Nothing is done without reason – everything is counted and contributes to this planned advancement.

Very different worlds have existed, leaving a significant imprint, though it is not recognised. The essential is here and now. Our spiritual way takes into account the destiny of each and every one, shall we say. Real work is being done, putting into place satisfactory elements to confirm the importance of this in the future. Every step taken contributes to the fulfilment of this vast program. To perceive it is not the most important thing; one must experience it inwardly and seek to deepen what is felt, what transforms the being in its subtlest nature. The elevation of the soul leads to the discovery of the true self; in reality, a whole world exists there. It is up to each one to progress towards the goal. Our constant help is there, with all the love possible. This is how it is.
