Whispers from The Brighter World

Monday, September 5, 2016 — 10:00 a.m.

The discourse is always the same, as is the vibration of these writings, and yet every day brings progress on this path — a path characterised by a very special transmission whose effects are redeeming. Our abhyasis are making progress without realising it; how could they assess the impact of all the means proposed in this way of the heart — a path that is much more effective than it seems. The main thing is being accomplished in the shadows, one might say. This approach saves valuable time on the long journey towards the Eternal. In this, as in all things, repetition is necessary. It leads to a state of consciousness enabling one to grasp the subtlety of this method — one that has multiple resources for action. In the open or in the secrecy of the heart, well-guarded for each person, a unique work is being carried out. Time will lend reality to these comments. Each person receives according to his or her call; while this is not new, it takes on its true meaning in this way of Sahaj Marg. Rest assured, no one is forgotten. A heart that is offered up and committed makes progress in the most beautiful manner; thus emerge the very special effects of Sahaj Marg.

Blessings to all, especially on this day.
