Whispers from The Brighter World

Saturday, October 22, 2016 – 10:00 a.m.

Why so much hardship and incessant suffering for some people. This world has not finished learning, enduring, for a necessary and beneficial release according to the divine plans. A radical change must go through such stages. A global evolution is in the making, one that will be decisive for the future of humanity. Extensive plans are being developed that will facilitate the transformation of life, in its most significant aspects, for an unprecedented advance.

Sahaj Marg will have its place there, and its action will spread to all parts of the world, including those that seem inaccessible today. The divine energy will intensify in its action, to accomplish what is desirable for the general good. Everything happens slowly, tomorrow it will be different. Evolution goes through vibrational stages, delineating the necessary and possible progress in the present era. May each of our brothers and sisters advance appropriately.
