Whispers from The Brighter World

Friday, November 4, 2016 – 10:00 a.m.

Let yourself be carried away by this power that manifests here with such subtlety. These messages are the fruit of an extraordinary love; it comes from the depths of the ages and will manifest itself again in the future, for the good of this suffering humanity. Humankind must prepare itself to pass a turning point.... We are working in this direction, without being able to give real explanations, which could not be understood in the present era.

A huge step must be taken in this direction, so that minds open to the higher reality. This reality escapes human awareness; the time has not yet come when all these phenomena that are ignored today will be able to surface in consciousness and produce an unprecedented evolution. Everything will fall into place when deemed appropriate by this power that guides the world without its knowledge. Human beings believe themselves to be all-powerful; they are the manifestation of this force, in all its aspects. "All is nothing, God is everything."

Everything begins and everything ends, willed and orchestrated by this indefinable power in the current era.

Will it be one day – an unprecedented evolution will have to take place to really bring planet Earth to an acceptable level of evolution.

All of us here are working on this major undertaking, so that human beings fully reveal themselves to the divine consciousness, with our special Blessings.

Babuji
