Whispers from The Brighter World

Tuesday, November 8, 2016 – 10:00 a.m.

We fully support our dear great son Kamlesh in his action. Our Mission must adapt to the present times and prepare, as is proper, the future, when it will be appropriate to comply with new rules and laws, those made necessary by the very many changes which will occur on Earth. All will be done in due course, slowly but surely, and is already being put in place, without appearing to be. Certain vibrations escape human perception; so many phenomena are still unknown in the present era, very few human beings manage to grasp them. They are permanently deceived about the reality of matter. Our role is not to look into this aspect of things, and yet spirituality would become more accessible if that were the case. Everything in its own time; advancing in a process such as the one we propose helps one cross a vibratory space that is not insignificant. Each one advances at their own pace. A total commitment is very fruitful – the abhyasis who come to join us discover the effects of it. They are sometimes astonished by such an action, which cannot really be measured in this world of matter. May our Mission, carried by our dearest son, take a giant step forward. We are working in this direction and bless him especially.

Babuji
