Whispers from The Brighter World

Saturday, November 12, 2016 – 10:00 a.m.

This contact is much more than it seems; a special transmission is taking place here. These messages are charged, which distinguishes them from those written down elsewhere, often with good intentions – it is worth repeating.

It is advisable to adhere to those that we give here. In the future, our dear Kamlesh will have to be wary of the numerous imitators – fooled by spirits, and unknowing – as unfortunately there are many of them.

This realm is not spared from all that characterises human nature.

The quantity of our messages is unique in this genre; we are delighted by their reach, within this Mission and beyond. They will remain a very precious asset for all our abhyasis.

This path of Sahaj Marg is not lacking in resources – they will become apparent over time.

Everything is bound to change, in the right direction, and this is rather reassuring for the future of the world and of our spiritual path, in accordance with life on this Earth as a whole. Aiming for perfection, to approach it as best as possible, is positive. Good deeds have a deep meaning – they are very useful for the human race.

Let us work for the good again and again, one day the divine goal will be reached. This is the way it is.
