Whispers from The Brighter World

Saturday, December 10, 2016 – 10:00 a.m.

Time lends events their due importance; our Sahaj Marg Mission has a history that will last a very long time, for the good of all. These thousands of messages are not given in vain; many of our abhyasis are nourished by them daily and derive benefits of which they themselves are not aware. Nothing in the realm of spirituality is done without good reason; these have priority for us, you can be sure. Everything concerning our abhyasis holds our attention. We are happy to see them progress, integrating themselves better and better into this great unifying movement that allows in each one an opening of the heart, in keeping with our wishes and surprisingly productive.

It does take time, in such a register, to acknowledge this reality; the heart of the human being holds secrets, a history that characterises it and truly develops it over time. Mystery is a part of life; it shapes it little by little and gives it its true appeal. Who knows the mystery of his or her own life, what it has in store, from beginning to end. Better it is not to know, sometimes, and to discover over time what Karma holds for each incarnate being.

The power of the Spirit here is sovereign; surrendering to the Divine is the best way to gain precious time.

May all our abhyasis take full advantage of what Sahaj Marg offers them. Blessed they are to receive it, in their hearts and in accordance with our wishes. So it is.
