Whispers from The Brighter World

Saturday, December 31, 2016 – 10:00 a.m.

Your fervour and commitment do not weaken, and your sincerity is always the same. Why not emphasise once again what motivated our choice. Other mediums claim to replace you, they do not. This world of illusion, here too, manages to deceive the most enlightened people. This is how it is, and we are sorry about it. This is not new; I too, for a time, experienced such behaviour. No matter, in this domain the truth always establishes itself, as does vigilance, which we recommend. A new era is being prepared, we repeat this once again. Very slowly the necessary foundations are being laid, upon which humanity of the future will be able to rely.

Much time is needed on Earth for significant changes to occur. It has been so for a long time.

Our Mission is advancing against all odds through this movement that is nevertheless productive of the best that can be built – at all levels. Our dear son Kamlesh is an enlightened mind; we guide him in our own manner in order to act now, based on what is being prepared for the future. Some decisions may not be understood, this is not new; the Mission is advancing, isn't that the main thing.

May this new year make a lasting and very positive impact on what already exists for the best that can be. May all be strengthened and blessed.
