Whispers from The Brighter World

Saturday, May 13, 2017 — 10:00 a.m.

Certain sacred writings have been copied — imitated — which is inevitable; our way does not escape such human tribulations. A large body of writings emanating from the Source is taken into consideration, and it will go down in history as a precious good. Great ways of the past have had this privilege and this is normal; these Great Beings are to be respected. Masters of the past and the present form a whole: a salutary force for humanity. So much violence and ugliness still characterise this world that is far from having reached a stage of wisdom.

Many changes will occur in times to come, and the refuge of faith will be a real blessing for many human beings. The Sahaj Marg journey is not insignificant; it opens up spaces in areas that are blessed and carried by divine grace. We want the best possible, and we are constantly working in that direction.

May the best occur, under our ceaseless blessings.
