Whispers from The Brighter World

Tuesday, May 16, 2017 — 10:00 a.m.

Having reached the end of the road, life takes on its full significance and a different meaning. It takes time to understand all the subtleties of this journey. Each incarnation is an experience. Incarnations succeed one another, enriching this long path where the best can happen. How many incarnations are necessary before a human being is able to assess the path travelled — especially with regard to its usefulness for one's elevation! Life takes on its full meaning the moment the divine will can be fully established.

It takes time and wisdom to reach the desired level; thus the best can be fulfilled according to divine plans.
