Whispers from The Brighter World

Thursday, April 24, 2014 – 9:30 a.m.

Imperceptibly, the vibrations are changing at certain points on the Earth; little by little they are becoming more refined, as a prelude to substantial changes to come in a distant but real future. We have provided some bits of information on the subject and will continue to do so once these have been assimilated. While the basic teachings will not change, certain aspects will conform to the situation as it will be then.

The teachings and the work of the Mission in general help the aspirant in different ways; preserving their vibratory integrity is a positive and essential point. The subtle bodies of the human being condition the whole personality, and they must be harmoniously aligned, one might say. Our practice contributes to this, supporting what must happen naturally – though it is not simple in these times that are troubled at all levels. The incarnate physical body is one of the aspects of the human personality. It remains for the majority of men and women to probe the depths of what it really is, although many in this era are able to grasp all its subtleties. Following a spiritual path like Sahaj Marg offers opportunities, and we are here to open up some enriching perspectives for abhyasis on their own reality. Ignorance has been cultivated here below for so many centuries; the future will remedy this, and our path will participate in this

great challenge: to open the seeker to true knowledge, a knowledge to which many of our brothers and sisters aspire. This will happen; that is how it is.
