Whispers from The Brighter World

Tuesday, May 27, 2014 – 10:00 a.m.

Rituals are inscribed in time; at this level, they form a sacred chain that contributes to the building up and greatness of our Mission. Everything has its importance – seminars that must be renewed to keep the flame alive – what better than these major events and group meditations to strengthen what already exists and give it greater scope? Becoming truly aware of the greatness of this spiritual movement leads to a deeper commitment.

Everything is done at our level for the advancement of this Mission and to strengthen it on its already firm foundations. The future will give it a choice place; it will be inscribed on the same ledger as the great paths that have already influenced this world. This way is adapted to current times and will perfectly comply with future ones. Solid and structured in its principle, it will evolve according to circumstances and meet the growing expectation of fervent hearts. All the notions so often mentioned here will develop in the collective consciousness. Spirituality is the basis of all evolution – it is necessary to human beings, far more than they imagine. It builds them up steadily, at levels they cannot even conceive of; they misunderstand their innermost nature, whose complexity is great, much greater than it seems. The approach proposed in our way enables them to advance towards what is decisive for the pursuit of their spiritual upliftment. The complexity of human nature is great, most of the time masking the jewel

that lies within. Our method helps them refine it and give it all its radiance – there lies the divine purpose.
