Whispers from The Brighter World

Thursday 17 November 2016 – 10:00 a.m.

A profound vow, a sincere appeal, cannot be ignored. We strive to respond to it in our own manner. The history of each of our abhyasis and the history of our entire Sahaj Marg Mission comply with laws, with divine principles which human beings are not aware of. They access what is possible for them, without being able to determine what their lives will be. Tomorrow is the unknown, Karmic laws do not easily reveal themselves; only time can do so and clarify their requirements. Human beings are in this situation, hence the need to surrender in order to truly progress and detach themselves from what is useless and which too often calls out to them. Human beings lead their lives as they can; blessed are those who adhere to truth, to what is accessible to them, by proceeding along a spiritual path capable of broadening within them the horizon of knowledge – the one we advocate on this path where real work is carried out on each one.

This fact is a blessing; many hearts are joining this effective redeeming movement that is so very blessed by the higher authorities. To all, faith and courage in coping with the uncertainties of life. Everything has its raison d'être and bears fruit; there lies the essential thing. May all be blessed and strengthened in their quest.
