Whispers from The Brighter World

Tuesday, May 8, 2001 – 10:00 a.m.

Time is precious, lost time cannot be made up for. Make the most of the light given to you all to make your lives a success. Advance on the path with joy in your hearts, realizing how lucky you are to have reached this stage of evolution.

Your brothers and sisters who are advancing in the darkness must move you; let thoughts of love and compassion rise from your hearts to them.

This passage on Earth is decisive in your evolution, don't let your chances be lost in the turmoil of the day. The vagaries of life must serve you all; your experiences, good or bad, should help you to move forward, to enlighten you on the reality that hides behind all these tribulations.

This succession of moments lived in the spirit that characterizes you all today, and the fruit of wisdom acquired over time, make your lives a permanent source of enrichment.

Be receptive to everything that might happen, don't overlook any detail, everything has its importance.

Signs are given to you all, which mark your path; it's up to you to decode them.

Let your heart express itself in all circumstances, don't restrain it, it must play its role in your Earthly existence; it embellishes it, gives it its letters of nobility. These will persist beyond this incarnation. They will remain inscribed on the tables of time.
