We want to sensitize you on this aspect of your process, but don't feel guilty if you don't feel carried away with love. That does not prevent you from advancing. You will experience this happy state, sooner or later. You are engaged in a way; you do everything we ask you to do. Your steadfastness bears its fruits even if that is neither visible to the others, nor felt by you. Everyone has their own reactions, their way of being. There is no standard model, therefore continue to do what you can, with all your heart. We do not ask of you anything more.

"In a group, a great diversity exists, but the entire group forms a coherent whole. The various elements of a physical body form a harmonious result which functions well. The human creature is a beautiful achievement.

"There, we are working together so that you can go as far as possible and spiritual realization is achieved inside you; it is the ultimate result. Let us continue to advance towards this goal for your greater happiness and ours."
