Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Saturday, April 15, 2000 – 8:00 a.m.

You are our beloved daughter; for this reason we want the best for you. France is not a country where a true medium can blossom while benefitting from the understanding and respect of one's peers, at least generally speaking. The old taboos of the Church have influenced people's minds, and this is nowhere near changing – even in Sahaj Marg where, moreover, a kind of intellectualism is diverting people from the esoteric reality.

The spiritual practice also suffers from this; many find it difficult to let go and to be deeply committed to a real redeeming work. A wider knowledge of these messages is not for tomorrow, but fortunately there exist other countries in the world where they will possibly be appreciated for their true worth.

Thanks to this work with us, you are able to give the full measure of your channelling power and to blossom in the love which we return to you well.

Babuji
