Whispers from The Brighter World

Friday, October 29, 1999 – 8:00 a.m.

We are happy to see you using a modern means of communication. You will get accustomed to it, and that will make life easier for all of you.

Looking back at human evolution since the caveman, just imagine what humans went through.

The most interesting perspective concerns their spiritual evolution. In ancient times, they feared the elements, they suffered from them and therefore dreaded them. They used to beseech the sun, the moon, as well as the rain that was both useful and fearsome to them.

Thus did they acquire the habit of beseeching a higher force without really being able to identify it.

Humans of today have nothing in common with those of yesterday. They have more knowledge, but they are not spared the blows of fate despite all modern comforts. Do they have a better understanding of the higher reality and the goal of their existence? There's still such a big step to be taken in this direction that it's distressing.

You are fortunate, all of you who have understood, who are searching and constantly evolving on the spiritual level. We rejoice in this – rejoice with us in being part of the chosen, there remains so much to do for humanity.
