Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Sunday, October 31, 1999 – 10:00 a.m.

There would still be much more to tell all of you, but we cannot do so, as we are to remain within certain limits. In the first series, we have stated truths that are bound to shock. We must advance prudently.

It's better not to shake up generally accepted ideas. The only truth on which you all must concentrate is your own advancement.

You have understood this for a long time, and you are making efforts to progress.

We will never stress enough that these efforts must concern the connection with the inner Master. It 'all' lies there, within yourselves. It is the living Master's work to make you progress in this direction and to make you go further and further into this discovery. There lies the divine miracle, this presence within you, this omnipresence. You have always been intimately linked to the Creator, but perhaps you didn't know it. It would be better to say that you were not really aware of it.

See only this objective to be achieved: total, perfect union with the divinity that inhabits you. The important point is well targeted. Do your practice and never lose sight of our teachings.
