Whispers from The Brighter World

Wednesday, November 3, 1999 – 10:00 a.m.

My dear child, we have told you often enough, do not mind the reactions of your fellow human beings to our contacts. The abhyasis speak without knowing. What do you care what they say. As for my son, he is not forthcoming as yet, but he appreciates it; that's what matters.

Don't you have enough worries? Let people talk and let your heart be at peace. I had to endure much more, believe me, regarding the messages I received.

Not only did some of my brothers consider me a simpleton, but also as living in a state of delirium.

How could these great beings manifest themselves to me? That was beyond them. Very great Masters in India or elsewhere were not mediums. They communicated on other planes with higher entities, but they did not have this gift. That's the way it is, and it in no way hindered their immense capacities on the spiritual level. All this is not easy to understand for ordinary people who do not have these perceptions.

Go your own way, don't worry about the rest. You will never be able to prevent this kind of stupid talk from reaching you. Be blessed for everything you do.

Babuji
