Whispers from The Brighter World

Saturday, December 4, 1999 – 10:00 a.m.

What we are saying may sound exaggerated to you, but we who have a complete vision of what is taking place on the Earth, have grounds for being dismayed. France, compared with other regions of the globe, does not have too much to complain about for the moment. Do not forget however that in certain countries terror, famine and complete insecurity prevail.

You are privileged people; do you truly realise it?

The Earth has entered a very harsh stage of its evolution. It must go through the torments that we have just mentioned. Let us not go any further for the moment. You must live in the present, keeping a positive view of things. One should not however turn a blind eye; you are men and women of this time and you must face up to things. All that happens to you in this life is within your capabilities.

You are fortunate to have the recourse of faith; it is a great strength.

Keep moving on and advancing towards perfection; it is your salvation.

Be blessed in all your undertakings and above all do not have doubts if everything does not go as you wish.
