Whispers from The Brighter World

Wednesday, December 22, 1999 – 10:00 a.m.

Do not forget the symbol and especially the five-branched star.

Remain united through the heart. Go beyond your differences; if there are any at the human level, we do not see them. It is important for the future. We have insisted enough, you will all understand one day. As for what is essential, you are identical, in the same frame of mind with identical motivations.

We had good reasons to bring you together. You are at the same time very different and similar; this is what makes the strength of a group.

We often repeat ourselves, it is indispensable. Be always vigilant about your reactions towards your brothers and sisters. Each person has their own personality; it is what makes the diversity of creation and its originality. Each being is unique in their kind; they carry their own seal, a unique molecule, undetectable to the human eye. There are more surprises in store for researchers. They still have a long way to go in terms of scientific discoveries.
