Whispers from The Brighter World

Tuesday, January 11, 2000 – 10:00 a.m.

Channelling is little known and poorly understood. Too many taboos and the ignorance of this possibility make it so that many individuals reject it.

The 'great minds' of your time who believe they are enlightened about all the mysteries of life would do well not to neglect any aspect of it. A complete mutation of the beings living on Earth will take place over time. The real possibilities of humankind, increasingly reduced to a passive role, will re-emerge out of necessity.

In the future, people will have to go back to a human dimension that is truer and better adapted.

Time must do its work, transformations take place slowly. When the system is completely distorted, one has to go back, to rediscover fairer values. Progress, if it goes too far, can bring misery to human beings; it will then be necessary to stop everything with destruction. So has it been since the beginning of time, where civilizations more advanced than yours in terms of excess were annihilated.

Don't panic, that is not for tomorrow.
