Whispers from The Brighter World

Tuesday, February 10, 2004 – 10:00 a.m.

People complicate, to their heart's content, everything on this Earth. They allow themselves to be drawn into considerations that make no sense and go against the self-emptying that's desired in a true spiritual process. They often get bogged down in uselessness, straying completely from their goal. By not giving themselves all the means to achieve it, they slow down their evolution. Awareness must be raised within them, and the teachings of the Master and writings such as these can touch them for this purpose.

Practice does its work within each person, consecrated by the work of the divine Being leading our Mission on Earth. This work is endless, it has to be repeated constantly. It's not easy to deal with humans; everything moves so slowly in this world. As incarnate beings, it's a real challenge for people to make the right choices and stick to them, in order to carry out their life plan correctly. Nothing is easy, temptation is everywhere, and the modern world, because of its harmful disturbances, scatters energies, thus reducing each person's attention and concentration. Our brothers and sisters have understood this, giving time, as a priority, to their daily practice; thus subtle currents are created, communicating with what represents the very essence of our way. They connect with powerful forces, whose impact they cannot measure, but the time devoted to these practices is infinitely precious. They thus dissociate themselves from an ambient negativity fuelled by the aberrations of current life, by creating for themselves a

universe of beauty. Many beings aspire to find a spiritual path that suits them; it's not easy for them to do so, with so many misconceptions cluttering their minds. May clarity arise in their hearts and guide them wisely.
